

HEATED HOLDING SOLUTIONS | ALTO-SHAAM®

# Willing to try **the untried.**

We pioneer solutions to address our customer’s challenges. Equipment systems designed to give our customers the confidence they need to embrace fresh perspectives and seize new opportunities. So every day we strive to design foodservice equipment solutions that are as intuitive and efficient as they are dependable — helping our customers achieve a greater return on their investment and enabling their creativity to flourish. Because we earn our reputation helping our customers earn theirs.

With headquarters and manufacturing in Menomonee Falls, Wisconsin, Alto-Shaam proudly provides foodservice equipment solutions made in the USA to more than 90 countries globally.

OUR STORY

1960s

**Jerry Maahs**, founder, seeking a way to keep fried chicken hot for delivery during Wisconsin winters, uses thermal cables to create innovative holding cabinets. Halo Heat® debuts at the 1968 National Restaurant Association Show.

What began as an experiment with the overnight cooking of prime rib leads to the creation of an entirely new category of commercial kitchen equipment:  
**Cook & Hold ovens with exclusive Halo Heat® technology.**

1970s

1980s

Seeing a growing need for modern kitchens to become ever more versatile and efficient, Alto-Shaam fills that need with the groundbreaking **Combitherm® oven.**

Evolving into a forward-thinking company that offers complete kitchen systems results in dramatic growth and expansion, performing installations everywhere, from cruise lines to Antarctica.

1990s

2010s

Recognizing the industry changing potential of Structured Air Technology®, Alto-Shaam partners with Phil McKee, founder and CEO of Appliance Innovation, to develop the revolutionary line of **Vector® Multi-Cook Ovens.**

# A better way to win the battle against time.

Anyone who has ever been in a commercial kitchen knows that the clock can be the ultimate enemy. There's either not enough time — or there's far too much. The right heated holding solution can help you win the battle against time.

But not all solutions are the same. Other heated holding technologies use fans to distribute heat that is usually too hot and harsh, which degrades food quality by removing moisture and flavor.

At Alto-Shaam, we know that heated holding is a necessity in every professional foodservice operation. That's why our founder worked so hard to invent and perfect a solution. Looking for a way to meet the needs of his customers and keep food hot for delivery, Jerry Maahs introduced Halo Heat® technology to the industry.

Halo Heat uses unique thermal cables to provide gentle, radiant heat to food — for the highest quality. Now you can stop watching the clock, and focus on serving the best to customers. Just like Jerry did.

## Limitations with other technology

**Harsh heating elements**  
such as cal rods, overcook food and vary in temperature reaching up to 350°F (175°C).

**Fans**  
within other hot holding dry out food.

**Added humidity**  
and water degrade food quality and increase operating costs.

# Better food quality.

Say goodbye to overcooked and dried out food. Alto-Shaam’s Halo Heat® technology provides better food quality. A unique thermal cable provides gentle, radiant heat that evenly surrounds food without the use of extremely hot elements, added humidity or fans.

When holding food for an upcoming service or merchandising product, Alto-Shaam’s equipment with Halo Heat technology is designed to make time stand still for optimal product quality. This allows for food preparation outside of busy service times, flexibility and less waste.

Gentle, low-temperature heat keeps food full of moisture and flavor. So once items are perfectly cooked, they stay perfectly cooked.

## Why Halo Heat®?

Features a low-density thermal cable that is wrapped around the sides and bottom of the holding cavity.

No water or added humidity needed. Food retains its natural moisture.

Gentle heat is distributed evenly throughout the holding cavity.

Thermal cable emits even, temperatures and pulses on and off throughout the holding process.

Sealed, static cooking environment traps natural flavor and juices, reducing shrink, improving food quality and extending hold life.

Thermal cable provides precise temperatures with minimal intensity, leaving food full of moisture and flavor.

No fans or harsh heating elements to degrade food quality.

# Quality-focused heated holding.

Designed with pioneering Halo Heat® technology, Alto-Shaam Heated Holding solutions keep prepared food warm and full of flavor for hours. The result? Operators save money, time and energy, while satisfying their customers with unparalleled food quality.

## COST SAVINGS

### Expand Menus.

Prepare food hours before serving, and hold it at the optimal temperature for the best quality and taste.

### Reduce Labor Costs.

Set it and forget it. With intuitive controls and simple operation. Come back to food that is held to perfection.

### Save Energy.

Equipment costs less than \$2 per day to operate.

### Maintain Food Quality and Reduce Waste.

Keep product at its perfect serving temperature for hours without overcooking or drying out, leading to product waste

### Waterless Design.

Reduces installation and operating costs with no plumbing, drains, filtration or associated maintenance.

## PURPOSEFUL DESIGN

### Easy to Operate.

Manage heat controls with accuracy and confidence.

### No Heat Loss.

Cabinets sense rapid changes in temperature and automatically compensate for heat loss when the door is opened.

### Digital Display.

Ensure optimal holding temperatures with a clear, easy-to-read display.

### Stackable Designs.

Cabinets and drawers easily stack for greater flexibility and convenience while saving space.

### Easy to Clean.

Simply remove shelves and wipe clean.

### Made in the USA.

With a commitment to quality.

### Consistent, Even Heat.

Halo Heat technology provides controlled, uniform heat throughout the holding process.

Heated Holding | Single Compartment Cabinets

300-S

The 300-S is made for small spaces, from food trucks to compact commercial kitchens. Tight temperature tolerances and even heat distribution adds efficiency to your operation. The stackable, portable and ventless design helps optimize any small space.

**MAXIMUM PAN CAPACITY**  
2 Full-Size Steam Table Pans 4" or  
3 Full-Size Steam Table Pans 2 1/2" or
