

FRIES RANGE

VIZU SERVER

- To fit on the central service counter.
- Double sided chip dump and bagging unit.
- Temporarily store and display plated food.
- To be used for cooked food only.
- Keep chips warm via a heating element below and heat lamps above.
- Each heating feature can be controlled independently.
- Save power during the less busy hours.
- Wrap and chip bag storage can be found above the unit.
- Side mounted optional bagging rack.
- Bagging rack is angled and directed back to the chip dump area to keep all the chips where they should be.
- Removable chip dump area for easy cleaning.
- Raised grid to allow excess grease to drain away from chips.
- Unit is mounted on adjustable feet to compensate for unstable surfaces.
- Upper wrap and bag storage for both sides of the unit.
